

APPLICATION

Type SA trims are used to create a crisp shadowline perimeter detail where mineral fibre, g.r.g, plasterboard or full module metal ceiling tile systems abut walls, partitions or upstands. The horizontal web of the shadowgap can be factory slotted to form an air vent if required. Curved trims manufactured from composite sections to reproduce all type SA trims are available. Type SA trims can also be factory formed into column rings.

PRODUCT INFORMATION

Supplied in 3000mm lengths, extruded from architectural grade aluminium alloy to BS 1474. The standard finishes are white polyester powder coating to RAL 9010, 20% Gloss, or to order in a full palette of RAL colours, to match and enhance any interior scheme. Unpainted trims also available for onsite painting/spraying, please check with your paint supplier for any additional primer products that may be required. QIC cannot accept any responsibility for the painted finish of products supplied unpainted. Non-standard lengths, factory curving and alternative factory applied finishes are available to special order. Cleats can be used to form straight joints, internal and external corners and abutment details.
